

# LIGHTNING CABLE!

## FULL POWER – HALF THE WEIGHT!

ACCEL Lightning Cable allows your racecar to have the same amount of energy and power running thru your battery cables at half of the weight. The 4, 2, and 1/0 gage cable is half the weight of traditional battery cable. This allows you to lighten up your car or add weight where it will help the car handle better. The cable is available in 20 and 100 foot spools to re-wire one or several racecars.

- The ACCEL Lightning Cable is half the weight of standard battery cable
- ACCEL Lightning Cable is .12 lbs. per cubic foot
- Industry leading Copper Clad Aluminum which allows maximum energy transfer
- Easy to use compression fittings and terminals simply twist and screw on available in 4 and 16 packs
- Red and black heat shrink tubing kits available
- ACCEL Lightning Cable is available in 1/0, 2, and 4 gage
- Pre made 3 foot long grounding cables available in 4 and 2 gage
