

ACCEL 5MM 300+ FERRO-SPIRAL RACE WIRE

Contrary to what you may believe or have been told, **“Bigger isn’t always better.”**

ACCEL has engineered a way to put their race winning 300+ Ferro Spiral Race Wire core into a much smaller spark plug wire with only a 5mm diameter jacket. This is the same maximum energy core found in their 8.0mm, 8.8mm and 10.8mm ACCEL 300+ Ferro-Spiral spark plug wire sets, just in a smaller package. Why ??? Well it reduces weight, which is critical on a race car and it’s easy to hide on a street rod with a custom look engine compartment. The smaller diameter wire can be routed in and around places where a larger wire simply just cannot go for the ultimate in good looks and custom fit possibilities. You can easily hide these smaller 5mm spark plug wires if you like. If you want to show them off, the high gloss jacket is available in four great looking colors. Available with 90-degree spark plug boots to keep the spark plug wires routed as close to the engine as possible.

ACCEL 5mm 300+ Ferro-Spiral Race Wire

Straight Boots

- Black7540K
- Blue7540B
